PHOTOGRAPHIC RUNS
TMA numbers above and in body of map identify each tricamera run used in the compilation of this map. Numbers alongside open circles in body of map locate center of vertical photographs selected with sufficient frequency to serve as a reference index
LOCATION DIAGRAM
INDEX TO ADJOINING SHEETS
LEGEND
Control (elevation in meters)
Unmonumented control (elevation in meters)
Intersected point (elevation in meters)
Photo center (USGS flight numbers as indicated)
Penguin rookery (Adélie, Emperor)
Ice free area
Islands (not plottable to scale)
Meltwater lake and stream
Glacier flow
Nunataks and peaks
Moraine
Ridge top with foot of slope
Escarpment
Slope
Crevasses
Note: Absence of crevasse symbol does not necessarily indicate a crevasse-free area
ANTARCTICA SKETCH MAP
BRYAN COAST—ELLSWORTH LAND
Polar Stereographic Projection
Standard Parallel 71° S
Scale 1:500,000
Compiled by the Geological Survey in cooperation with the National Science Foundation in support of scientific activities of the United States Antarctic Research Program
Control by USGS 1961-1962
Compiled in 1967 from U.S. Navy tricamera aerial photography 1965-1966
This map is part of a sketch map series utilizing best source data and control available at time of compilation. Features shown on this map may be subject to delineation when this area is mapped as part of the 1:250,000 scale reconnaissance series
Names approved by the U.S. Board on Geographic Names
INTERIOR—GEOLOGICAL SURVEY, WASHINGTON, D. C.—1966
