State Map Index

This index is designed to inform map users of the various map series, special maps and map byproducts produced and distributed by the U.S. Geological Survey and to assist users in selecting and purchasing maps. The index identifies quadrangle areas by map name and scale. A map is usually named after the most prominent city, town or natural landmark shown on it.

For improved readability the state map index is portrayed using a spherical reference grid using latitude-longitude coordinates stored in units of decimal degrees.

How to Use this Map Index

The listing for each map includes the **Map Name** corresponding to the name shown on each quadrangle; the **Locator**, a letter and number system on the index map border that corresponds to the map name; the **Map Ref. Code**, an index number based on the map's southeast corner coordinates; **SE Corner Lat. and Long.**, the latitude and longitude for (in most cases) the southeast corner of the map; **Date**, the latest date printed under the map name in the lower right-hand corner of the map; and the **Stock No.**, a unique number needed to process and order.

For commercial map dealers please see
http://mapping.usgs.gov/esic/map_dealers/index.html

To visit the USGS Web site please see

How to Obtain USGS Maps

Use the information in this index to fill out a USGS Maps Order Form. Order forms and instructions are available. For further information call 1-888-ASK-USGS.

Published maps listed in this index may be purchased by mail or in person from commercial map dealers or from USGS by contacting:

Information Services
USGS
Box 25286, Federal Center, Bldg. 810
Denver, CO 80225

When ordering maps from the USGS by mail, prepayment is required. Make remittance payable to Department of the Interior - USGS.
