CAUTION
AIR INFORMATION CURRENT THROUGH 24 NOVEMBER 1975
Consult NOTAMS and Flight Information Publications for the latest air information; the DOD Aeronautical Chart Updating Manual or MOD (U.K.) Aeronautical Chart Amendment document, for other chart revision information.

LINES OF EQUAL MAGNETIC VARIATION FOR 1975
(Annual rate of change 2' decrease)

ATTENTION
THIS CHART CONTAINS MAXIMUM ELEVATION FIGURES (MEF)
The Maximum Elevation Figures shown in quadrangles bounded by ticked lines of latitude and longitude are represented in THOUSANDS and HUNDREDS of feet above mean sea level. The MEF is based on information available concerning the highest known feature in each quadrangle, including terrain and obstructions (trees, towers, antennas, etc.).
Example: 12,500 feet 12 5

NOTES
No obstructions 200 feet or more above ground level are known to exist within this area.
Names for symbolized populated places are omitted where information is not available or where density of detail does not permit their inclusion.
A lane is generally considered as being a minimum of 2.5 meters (8 feet) in width.
Contours are approximate and their values will not necessarily agree with airfield or obstruction elevations.

TERRAIN ELEVATIONS
HIGHEST KNOWN elevation is 1654 feet at 23°29'S, 31°33'E.
± following elevation value indicates accuracy is not within 165 feet.
