[1] Incorporated cities.
[2] Coastline of the 50 states, not counting offshore islands. Measurements were made with a 200 statute mile limit in accordance with a study by the Office of Coastal Zone Management, U.S. Department of Commerce, which was the first study to use the coastline of the 1:2,000,000-scale Geological Survey Digital Line Graph (DLG) series. Coastline of inlands and bays is included for a point where they narrow to a width of one statute mile or less, and for the Great Lakes and their islands.
[3] Figures obtained for 1939 from a study conducting measurement on the original scale maps and DLGs of the Office of Coastal Zone Management, U.S. Department of Commerce. Shoreline of inlands and bays is included to the head of tidewater or to a point where tidal marks narrow to a width of 100 feet.

Delicate Arch, Utah

Cape Elizabeth, Maine

Rosemate Bridge, Iowa

Teton Range, Wyoming

HIGHEST MOUNTAINS	feet
