

WORLD SEISMICITY 1979-1988

This plate shows a world map of seismicity for earthquakes that occurred from January 1979 through December 1988. The symbols are plotted on a grid of latitude and longitude. The symbols are colored according to their depth and size according to their magnitude. The symbols are plotted on a grid of latitude and longitude. The symbols are colored according to their depth and size according to their magnitude.

Magnitude	Depth
4.5 - 5.4	0 - 70 km
5.5 - 6.4	0 - 300 km
6.5 - 7.4	> 300 km
