

Prepared under the direction of the Department of Defense and published by the U.S. Army Topographic Command, Washington, D.C.

On this map a LANE is considered as being a minimum of 2.4 m (8 feet) in width... Dense forest or jungle indicates more than 25 percent of ground is concealed by canopy with undergrowth generally impassable on foot.

In areas of dense or clear forest overprinted with bamboo symbol, the vegetation is predominantly bamboo. Vegetation classified by field observation and office identification from aerial photography.

The number in parentheses following a village name indicates that more than one village is so named.
