

Thematic categories presented are based on the following base maps: (1) Darter, Scales, and Pugh, *Geological Map of the Conterminous United States*, a digital elevation model, published by the Geological Survey, Miscellaneous Investigations Map I-2526, scale 1:1,000,000, and (2) King, Philip, and Bennett, *Geological Map of the United States*, published by the Geological Survey, Miscellaneous Investigations Map I-2500, scale 1:2,500,000. Please note a partial representation is shown because of the different projections and scale used in the compilation of these maps. We have modified the geologic map in some areas of low relief where a network of topographic was used instead.

A TAPESTRY OF TIME AND TERRAIN
